

# Nozzles 900 Series

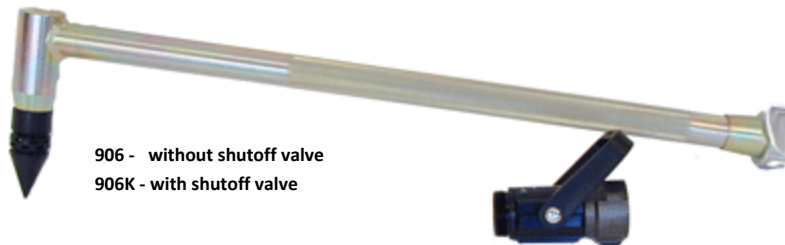

These new nozzles combine the best of durability, flexibility, and are lightweight. They all have removable nozzles which allow for extension tubes to be added for extra reach (2 feet per extension). They can also be driven in with a small mallet if needed. This unique nozzle design needs to be driven in only 1.75 inches to have full penetration of the sprayer unit. Ideal for breaching walls, coverage of up to 25 feet in all directions. It is powerful enough for fires in attics,

902 - without shutoff valve  
902K - with shutoff valve

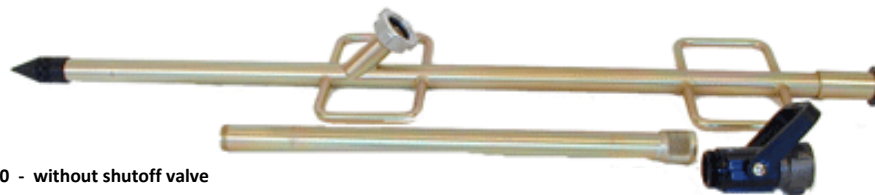

904 - without shutoff valve  
904K - with shutoff valve

These piercing nozzles feature a unique safety handle. The safety handle allows a firefighter to safely hold the unit when a mallet is being used to drive the nozzle in. They come with 1.5 NST threads as standard. Other threads are available. Designed for the rugged demands of the fire service world wide. Mounting Brackets included. All models available with or without valve.

906 - without shutoff valve  
906K - with shutoff valve

910 - without shutoff valve  
910K - with shutoff valve
